Summary

   I'm a Front-end Software Engineer with experience in Website Development. With my knowledge of UI/ UX design, I enjoy solving front-end problems and creating the best user experience for users.

   I am adept at translating design concepts into functional web pages, ensuring seamless navigation and optimal performance across different devices and browsers. Whether it's implementing responsive layouts or optimizing website performance, I am committed to delivering high-quality front-end solutions that exceed user expectations.

Skills

- **Programming Languages:** JavaScript | TypeScript | C++ | C | MongoDB | Node | Express | React | Git
- **Frameworks/ Platforms:** ReactJS | AngularJS | Bootstrap | TailwindCSS | NodeJS | ExpressJS | Figma
- Frontend | Backend | Full-Stack | English (C1), Japanese (N5)

Projects

HEART2Heart: A social confession that helps students to express their feelings anonymously. Link to **GitHub**/ **(3/2023 - Current)**

Technologies: NestJS | AngularJS | Bootstrap | CandyPay | Deployment

Responsibility:

- Code Optimization: Writing clean, well-structured, and efficient code, and optimizing website performance by minimizing file sizes, reducing HTTP requests, and improving caching strategies.
- State Management: Implementing state management libraries (such as Redux or NgRx) to manage the application's state and ensure efficient data flow between components.

CREATIVE WIDGET: Develop with the purpose of helping customers create a website with a template.

Link to **GitHub**/ **Deployment** **(12/2023 - 7/2023)**

Technologies: NestJS | AngularJS | TailwindCSS | Bootstrap

Responsibility:

- Developing User Interfaces: Designing and developing responsive and user-friendly web interfaces.
- Cross-Browser Compatibility: Ensuring the compatibility of websites across different browsers and devices, and optimizing performance for improved loading times.
- Creating responsive layouts that adapt seamlessly to various screen sizes, including desktop, tablet, and mobile devices.

Experience

Front End Developer	**NCC Asia**	*Da Nang, Viet Nam*	**04/2023 - Current**

- As a React.js developer, my primary responsibility is to design and develop user interfaces using React.js.
- Responsible for identifying performance bottlenecks in the application and optimizing React for better speed and efficiency.
- Embrace the responsibility of delivering high-quality, scalable, and maintainable React applications that meet the project requirements and exceed user expectations.

Science Research	**Critical Thinking-Thinking for Success**	*Da Nang, Viet Nam*	**06/2021 - 12/2021**

- Collaborated complication of curricula for the Critical Thinking Skill of Da Nang Highschool students.
- Handled and analyzed data with **SPSS** to Independent Sample T-Test, Pearson correlation measures,... and derived the conclusions.
- The achievement of the project was the second prize at Da Nang Science and Engineering Fair and a Science Research Article published in RA Journal Of Applied Research.

Education

Bachelor of Software Engineering	**FPT University**	*Da Nang, Viet Nam*	**Studying**

- Major in Software Engineering
- GPA: 3.2/4.0

Others

- **Impression Award**: Won the impression prize for the FPT NihongoEng competition with the topic of "Beyond the Boundary". **(03/2023)**
- **Certificates:** Meta Front-End Developer Professional Certificate, Google UX Design.
